Summary

Detail-oriented cybersecurity fresher with knowledge of ethical hacking, network defense, and security tools. Experienced in performing vulnerability assessments and analyzing potential threats through practical environments. Eager to contribute in building secure systems and mitigating cyber risks.

Personal Projects

- **YARA-Based Malware Detection System**-Developed a malware detection tool using Python and YARA rules. Automated file scanning and malware identification processes. Created custom YARA signatures for threat detection.
- **Defending the Cyber Landscape Using a Multimodel Framework**
Designed a multimodal AI-based cybersecurity framework for threat detection and analysis Using lang chain and calling LLms locally from ollama. Integrated generative AI and vector store to implement RAG to enhance security monitoring and decision-making.
- **Phishing Email Detector**-Built a Phishing email detector which analyses emails if it is fake or legitimate, also analyses attachments with vulnerabilities if present and scores the level of risk present in the attachment. (Analysed 50+ phishing emails, reducing potential threats by 30% through detailed risk scoring and awareness report).
- **Murder Mystery Cybersecurity Event website(group)**- Led the design and development of an interactive cybersecurity-themed mystery game. Integrated steganography, cryptography, and digital forensics challenges. Co-ordinated team activities and managed project execution for event participants.

Experience

Cyber Sena R&D, Bangalore, Karnataka

Cybersecurity Research & Development Intern, 06/2025 - 08/2025

Researched enterprise security standards and governance frameworks. Explored security tools like Burp Suite, Nessus, and Autopsy for penetration testing and digital forensics.

Six Phrase, College

Gained hands- on experience for all . College Internship Program, 02/2025 - 04/2025

Future Interns, Bangalore, Karnataka

Cybersecurity Intern, 03/2026 - 04/2026

Project Based Internship where I completed tasks such as analysing phishing emails and creating a professional awareness report that businesses can actually use, prepared a Vulnerability Assessment Report for a Live Website.

Skills

Cyber Security Domain - Incident Response, Analysing Log alerts, Threat Detection, Compliance, Network Security, SIEM, Vulnerability Assessment.

Languages-Python (Proficient), Linux, Bash & Java (Basics)

Tools - Burpsuite, Metasploit, Autopsy, Reverse Engineering & Kali Linux Soft

skills - Team Collaboration & Analytical Thinking

Certificates

Network Defence Essentials (EC Council)

Pregrad Certificate of course completion for 3 months on Cybersecurity

Education

B-Tech in Computer Science, Cybersecurity as specialization, 2023 – 2027 at Jain (Deemed- to- be University), Bangalore, India

Achievements

Played Zonal Level U14 Cricket, Kolkata, India

Volunteered in FDP (Faculty Development Program) at college.

Currently engaged in Design team, Salus Club

Hobbies and interests

- Learning about new technological aspects
- Gaining hands on knowledge about work culture in companies
- Automobiles

Languages

English (Fluent), Hindi
